## Foreword

The New York State (State) Environmental Facilities Corporation (EFC), with its partner the State Department of Environmental Conservation (DEC), is responsible for the administration of the State's Clean Water State Revolving Fund (CWSRF) program. The CWSRF enables EFC to provide interest-free and low-interest rate financing and additional subsidy, in the form of grants or principal forgiveness, to support a variety of eligible water quality improvement projects, including municipally owned treatment works projects, stormwater/nonpoint source projects, and national estuary projects. EFC similarly administers the State's Drinking Water State Revolving Fund (DWSRF) program, with its partner the State Department of Health (DOH), to finance drinking water infrastructure projects.

The United States Environmental Protection Agency (EPA) provides Capitalization Grants to the State to support the CWSRF and DWSRF programs, and the State provides matching funds, as applicable. The CWSRF and DWSRF provide financial assistance to borrowers to undertake eligible clean water and drinking water projects. As borrowers repay their financings, the repayments of principal and any interest are recycled back into the CWSRF and DWSRF programs and are used to finance new projects as the funds "revolve" over time. In addition, EFC issues bonds to increase the capital available to fund projects in the CWSRF and DWSRF programs. EFC uses CWSRF and DWSRF assets as security for, and repayment of, its bonds.

In addition to the annual base Capitalization Grant, EFC is currently administering the federal money provided by the EPA pursuant to the Infrastructure Investment and Jobs Act (IIJA) of 2021 (P.L. 117-58), also known as the Bipartisan Infrastructure Law (BIL). IIJA was signed into law on November 15, 2021. IIJA provides additional funding to the State's CWSRF and DWSRF programs annually for five years – Federal Fiscal Years (FFY) 2022-2026. The State expects to receive approximately \$539 million under IIJA for this IUP Period, FFY 2026.

In addition to federal monies, EFC administers State funding that supports both clean water and drinking water infrastructure projects through programs such as the Lead Infrastructure Forgiveness and Transformation (LIFT) Grants, Green Resiliency Grants, Water Infrastructure Improvement Grants (WIIA), the Intermunicipal Water Infrastructure Grants (IMG), and the Wastewater Infrastructure Engineering Planning Grants (EPG) programs. Through the EPG program, \$29.1 million in grants have been awarded to 705 projects for the preparation of engineering reports. The grants have led to 504 new projects on the Intended Use Plan, of which 240 have closed financings totaling \$1.34 billion.

Since the inception of the CWSRF program in 1987, EFC has provided approximately \$22.9 billion in funding to support clean water infrastructure projects. When combined with long-term refinancings, EFC has provided over \$41.2 billion in financial assistance for CWSRF projects. Since the inception of the DWSRF program in 1996, EFC has provided over \$7.3 billion in funding to support drinking water projects. When combined with long-term refinancings, EFC has provided over \$11.2 billion in financial assistance for DWSRF projects to improve drinking water in the State. These amounts include WIIA and IMG grants that have been awarded to approximately 1,100 projects in support of approximately \$9.5 billion in water and sewer infrastructure investments. For more information about EFC's projects, please see our [Project Impact Dashboard](#).

The demand for EFC's financial assistance has remained high for several years. The State and federal government have continued their focus on and investment in water and sewer infrastructure, with the State having invested over \$6 billion in clean water infrastructure since 2017. For FFY 2026, EFC expects to execute over \$2.4 billion in new money project finance agreements through the CWSRF and DWSRF programs.

This CWSRF Intended Use Plan (IUP), which allocates FFY 2026 federal funding, identifies clean water infrastructure projects that would require over \$7 billion in funding. EFC anticipates that it will be able to provide approximately \$1.6 billion in interest-free or subsidized financings, grants, and principal forgiveness, which would address approximately 23% of the identified demand. Projects that do not receive interest-free or subsidized financing may receive market-rate financing, which can be at a more favorable rate than a borrower could obtain independently.

The DWSRF IUP is developed by DOH and may be found [on DOH's website](#).

# 1. Introduction

The federal Water Pollution Control Act (Clean Water Act) requires the State to annually prepare an IUP – a plan identifying the intended uses of the funds in the CWSRF and describing how those uses support the goals of the CWSRF. The State issues a Final IUP annually after a public review and comment period. The EPA must receive the Final IUP before it awards the Capitalization Grant to the State’s CWSRF.

This IUP provides information about which types of projects are eligible for CWSRF assistance, how the CWSRF works, the type of financial assistance available through the CWSRF, and the sources and uses of the CWSRF during the FFY from October 1, 2025 through September 30, 2026 (IUP Period). This IUP also provides links throughout to resources on [EFC's website](#).

The 2026 IUP includes the following CWSRF program changes:

- Amended Scoring Criteria
- Hardship Policy revisions
- Allocating IIJA Emerging Contaminant grants

The table below summarizes important program dates during FFY 2026:

<b>Date</b>	<b>Description</b>
October 1, 2025	Beginning of FFY 2026 and Effective Date of this FFY 2026 IUP
May 29, 2026	Income survey deadline (if applicable)
May 29, 2026	Financing applications due for all projects
May 29, 2026	New project listing deadline for the FFY 2027 IUP
August 2026	Draft FFY 2027 IUP issued
September 2026	Comments on Draft FFY 2027 IUP due
September 30, 2026	End of the FFY 2026 IUP year

# 2. IIJA Funding

IIJA is an investment by the federal government in our nation’s core infrastructure priorities, including water and sewer infrastructure. IIJA provides additional federal funds for CWSRF projects through two capitalization grants: the CWSRF General Supplemental Capitalization Grant and the CWSRF Emerging Contaminants Capitalization Grant. All IIJA-funded projects serve the purpose of infrastructure construction and job creation.

IIJA funds provide additional federal funding that is made available at below-market interest rate financing or as additional subsidy (in the form of grants or principal forgiveness) for the construction of eligible CWSRF projects.

IIJA is not a permanent source of funding. IIJA funds were provided only for FFYs 2022-2026 and are subject to final approval of Capitalization Grant allotments by the federal government. Estimated amounts are subject to change. EFC has allocated all expected IIJA General Supplemental funding to projects.

***Compliance with all federal equivalency requirements is necessary for many projects funded through IIJA.*** These projects will have an “E” notation in the Annual Project Priority List designating them as “equivalency projects.” See [Section 9C](#) for additional details regarding equivalency requirements.

## A. CWSRF IIJA General Supplemental Funding

All CWSRF eligible projects and activities may be funded under the CWSRF IIJA General Supplemental Capitalization Grant. See sections throughout this IUP for program criteria applicable to this funding.

Up to fifty percent additional subsidy up to a maximum amount of \$25 million will be offered to certain projects as outlined in [Section 8C](#). The remaining project cost can be funded with IIJA General Supplemental financing or other sources of funds.

For a project to be considered eligible for IIJA General Supplemental additional subsidy, the applicant/project:

- Must qualify for hardship as outlined in [Section 8B](#);
- Must not have closed an EFC financing or incurred SRF-eligible debt for the project before November 15, 2021;
- Must not have issued a Notice to Proceed to construction for the project dated before November 15, 2021;
- Must not have executed a long-term project finance agreement for the project;
- Must not be substantially complete before October 1, 2025;
- Must not have been on the Subcategory D1 list for two consecutive IUP years without closing on a project finance agreement with EFC; and
- Must comply with all applicable federal requirements as outlined in [Section 9C](#), if identified with an “E” notation in the Annual Priority List.

All additional subsidy amounts presented in this IUP for applicants/projects are determined based on the estimated federal Capitalization Grant awards. These federal awards are based on Congressional appropriations and subject to final approval of the federal CWSRF Capitalization Grant appropriations. Additional subsidy amounts in this IUP are subject to change in the event that the final federal appropriations are insufficient to fund all projects for which applicants are ready to proceed during the IUP year.

## B. CWSRF IIJA Emerging Contaminants (EC) Funding

IIJA EC funding is available for CWSRF eligible projects whose primary purpose is to address emerging contaminants. Emerging contaminants are manufactured or naturally occurring

physical, chemical, biological, radiological, or nuclear materials, which are known or anticipated in the environment, that may pose newly identified or re-emerging risks to human health, aquatic life, or the environment, including but not limited to, groundwater or surface water contamination caused by perfluoroalkyl and polyfluoroalkyl substances (PFAS), pharmaceuticals, personal care products, and micro/nanoplastics.

Up to one hundred percent additional subsidy up to a maximum of \$25 million will be offered to eligible projects as outlined in [Section 8C](#). Project scope not related to emerging contaminants may be funded with CWSRF Base or IIJA General Supplemental funds.

All additional subsidy amounts presented in this IUP for applicants/projects are determined based on the estimated federal Capitalization Grant awards. These federal awards are based on Congressional appropriations and subject to final approval of the federal CWSRF Capitalization Grant appropriations. Additional subsidy amounts in this IUP are subject to change in the event that the final federal appropriations are insufficient to fund all projects for which applicants are ready to proceed during the IUP year. Additionally, projects may be bypassed depending on certain criteria. See [Section 4F](#) for more information.

### 3. CWSRF Eligible Projects

EFC may provide CWSRF financial assistance for the planning, design, and construction of the following types of eligible projects:

- Publicly owned treatment works projects, including:
  - a. New, expanded, or rehabilitated wastewater treatment plants;
  - b. Security and cybersecurity for wastewater treatment plants and collection systems;
  - c. Sludge treatment and disposal facilities including biosolids reuse;
  - d. Collector, trunk, and interceptor sewers;
  - e. Sewer rehabilitation and infiltration/inflow correction;
  - f. Combined sewer overflow (CSO) and sanitary sewer overflow (SSO) abatement including green infrastructure stormwater controls;
  - g. Landfill leachate collection, storage, and treatment;
  - h. Energy efficiency projects for publicly owned treatment works; and
  - i. Water efficiency projects that conserve or reuse water, as well as reduce or prevent water loss.
- Stormwater/Non-Point Source (NPS) projects. These projects may be publicly or privately owned, and must be consistent with New York State's NPS Management Plan:
  - a. Green infrastructure projects that manage stormwater, such as constructed wetlands, bioretention, porous pavement, and green roofs; waterbody restoration, including stream bank stabilization, and erosion and sediment control;
  - b. Restoration of riparian vegetation, wetlands, and other waterbodies;

- c. Environmentally innovative projects that demonstrate new and/or innovative approaches to delivering services or managing water resources; and
- d. Practices that manage, reduce, treat, or recapture stormwater or subsurface drainage water.
- National Estuary Projects. These may be municipal and non-municipal projects that support and implement EPA-approved National Estuary Conservation and Management Plans for the New York-New Jersey Harbor, Peconic Bay, and Long Island Sound Estuaries.
- Construction, repair, or replacement of decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage.
- Projects that address emerging contaminants as described in [Section 2B](#).

While these project types are eligible for CWSRF financial assistance, each project is scored based on the project priority score system described in [Section 4C](#). Therefore, while eligible for assistance, an individual project may not qualify for the most advantageous assistance if it does not score well in comparison to other projects in its category.

## 4. Project Priority Lists - Evaluation and Scoring

Once projects are deemed eligible for financial assistance, EFC scores each project using a project priority score system. A project's rank relative to other projects in its category determines the type of financial assistance available for the project.

EFC determines the type of financial assistance eligible projects qualify for by:

- Compiling a list of the eligible projects from applicants that have expressed an intent to move forward with CWSRF financing in the IUP Period;
- Ranking those projects within each category on the Annual Project Priority List based on project score;
- Comparing the list to the amount of funds EFC has available to commit to projects for the IUP Period; and
- Establishing the Subsidy Line as applicable in each category to determine which projects may be eligible for subsidized financing in the IUP Period.

This evaluation and scoring process is described in more detail below.

### A. Multi-Year List and Annual List

The IUP contains two lists of eligible projects:

The Multi-Year Project Priority List (the Multi-Year List), included as Appendix A, identifies *all* projects for which applicants have expressed an interest in receiving CWSRF financial assistance. The Multi-Year List identifies projects alphabetically by applicant name, indicates whether the project is also included on the Annual Project Priority List (Annual

List), which category it is in, and the project score. Projects that are on the Multi-Year List and not on the Annual List **will not** receive financial assistance in the IUP Period.

The Annual List, included as Appendix B, identifies projects that may qualify for financial assistance in the IUP Period. The Annual List is a subset of the Multi-Year List. Project planning and design for projects on the Annual List is more advanced than projects that appear only on the Multi-Year List and should be prepared to move forward with construction within the IUP Period, as evidenced by the submission of an acceptable engineering report and estimated construction schedule. The Annual List is divided into the project categories described in [Section 4B](#). The Annual List provides the applicant's name, project description, estimated total cost of the project<sup>1</sup>, CWSRF Base and IIJA General Supplemental eligibility, and project score. The projects within each category are ranked in descending order of score. A project may receive financial assistance in the IUP Period only if it is on the Annual List.

See [Section 5](#) for information about adding a project to these lists in future FFYs.

## B. Project Categories

The Annual List is divided into seven categories as follows:

- Category A – Projects serving a municipal population of 3,500 or less.
- Category B – Projects serving a municipal population of 3,501 through 2,000,000.
- Category C – Projects serving a municipal population of more than 2,000,000.
- Category D – Projects that meet eligibility criteria for interest-free financing in accordance with the Hardship Policy.
  - Subcategory D1 – IIJA General Supplemental Additional Subsidy projects.
- Category E – Non-municipally owned projects. EFC is not entering into new agreements with non-municipal entities in FFY 2026.
- Category EC – IIJA Emerging Contaminants Additional Subsidy projects.
- Category G – Green Innovation Grant Program (GIGP) projects that meet EPA's Green Project Reserve criteria ([Section 9G](#)).

Municipal population is determined based on population data from the 2023 American Community Survey's five-year estimates, or, in EFC's discretion, by other means if the five-year estimates are not reflective of the population served by and financially responsible for the project.

---

<sup>1</sup> "Total cost" includes all eligible costs associated with the erection, building, acquisition, alteration, reconstruction, improvement, enlargement, or extension of a project; the inspection and supervision thereof; and the engineering, architectural, legal, fiscal, and economic investigations and studies, surveys, design, plans, working drawings, specifications, procedures, and other actions necessary for the construction of the project. Project costs should include anticipated inflation and contingency factors.

## C. Project Score System

EFC scores CWSRF-eligible projects in Categories A, B, C, D, EC, and E using the criteria stated in 6 NYCRR § 649.3. These scoring criteria are available on [EFC's website](#). Projects that improve and restore water quality generally receive the highest scores. In 2025, EFC amended the scoring criteria in 6 NYCRR § 649.3 to include priority points for asset management, resiliency, and green infrastructure.

EFC scores projects based on:

- Existing Source – the existing conditions of the receiving waterbody based on DEC classification;
- Water Quality Improvement – the DEC classification of the resource that will be improved, restored, or protected based on the classification of the receiving waterbody; and the severity of impairment of the affected waterbody;
- Consistency with Management Plan Criteria;
- Need for the project based on an obligation or mandate for the project required by an executed enforcement instrument or a State Pollutant Discharge Elimination System (SPDES) permit;
- Construction of sanitary sewers to replace septic systems;
- Financial Need based on median household income (MHI);
- Addressing assets identified in the capital improvement plan of a final Publicly Owned Treatment Works (POTW) asset management program that was developed in accordance with DEC's POTW Asset Management Guide;
- Resiliency and climate adaptation, mitigation, or cybersecurity enhancements for water quality infrastructure; and
- Incorporation of green infrastructure; or water or energy efficiency at a POTW.

To receive the most accurate project score and ranking, applicants must submit all available relevant project documents by the relevant project listing date noted in the table in [Section 1](#).

GIGP Projects in Category G are scored using a separate scoring system that is discussed in [Section 9G](#).

## D. Annual List Funding Lines

A "Subsidy Line" has historically been established in Categories A and B on the Annual List to identify projects that qualify to receive subsidized financing in the IUP Period, subject to timely submission of an acceptable financing application. ***All projects in Categories A, B, and C with a total score of at least 10 points qualify for subsidized financing in this IUP Period, subject to submission of an acceptable financing application by May 29, 2026.***

**Please note:** Projects in Categories A, B, and C are not eligible for interest-free hardship financing or IIJA General Supplemental additional subsidy.

A “Hardship Line” has historically been established in Categories D on the Annual List to identify projects that qualify to receive hardship financing in the IUP Period, subject to timely submission of an acceptable financing application. **All projects in Category D with a total score of at least 10 points qualify for hardship financing in this IUP Period, subject to submission of an acceptable financing application by May 29, 2026.**

A “Funding Line” has historically been established in Subcategory D1 on the Annual List to identify projects that qualify to apply for Additional Subsidy (including IIJA General Supplemental funding) according to the CWSRF Hardship Financing and Additional Subsidy Eligibility Policy (“Hardship Policy”). **All projects in Subcategory D1 with a total score of at least 10 points qualify for additional subsidy and financing in this IUP Period.**

The availability of funds for applicants/projects on the IUP is determined based on the estimated Capitalization Grant awards. These federal awards are based on Congressional appropriations and are subject to the final approval of the federal CWSRF Capitalization Grant allotments. The amount available to individual applicants/projects is subject to change in the event that there are insufficient funds to provide to all projects for which applicants are ready to proceed in the IUP year.

## E. Bonus Points

To ensure that projects in Categories A, B, and C will have sufficient funds to complete construction, EFC adds 1,000 bonus points to the original project score when a short-term subsidized financing agreement is executed, and an additional 1,000 bonus points, or 2,000 bonus points total, when a long-term subsidized project finance agreement is executed for a phased project. EFC may commit financing to a large project in phases or segments over several years. When a project is financed in phases, the additional points are applied to all project phases to ensure subsequent phases continue to be eligible to receive subsidized financing to complete the project. To be considered a phased project, all phases of the project must be defined within one engineering report and the environmental review must include the scope for all phases of the project.

## F. Project Bypass

EFC may bypass a project on the Annual List when EFC, in its discretion, determines the project will not be ready to execute a project finance agreement during the IUP Period.

Examples of when a project may be deemed not ready include:

- The applicant fails to submit an acceptable financing application by the applicable application due date;
- The project is delayed or the scope is substantially modified;
- The project listing or financing application is withdrawn by the applicant;
- The applicant fails to submit items that are required to execute a project finance agreement;

- The financing application has expired; or
- The financing application is inactive as noted in [Section 8F](#).

EFC may re-allocate funds from any bypassed project to other projects within the same funding classification (i.e., CWSRF Base, IIJA General Supplemental, or IIJA EC), some of which may be ranked with a lower score on the Annual List. If EFC bypasses a project, the project may be considered for funding in a subsequent IUP Period, subject to project updates described in the next section.

## 5. Project Listing and Project Updates

To list a project on the IUP, an applicant must submit project information through EFC's [Project Listing and Update System \(PLUS\)](#), including:

- Contact information;
- Project scope;
- Current project budget, incorporating reasonable contingency and forecasted inflation factors;
- Project schedule; and
- Confirmation of acceptance of program requirements.

When EFC has the above information, a project will be included on the Multi-Year List. For a project to be included on the Annual List, the applicant must submit an acceptable engineering report by the applicable listing deadline noted in the table of program dates in [Section 1](#). See [Section 7](#) for requirements related to project design documentation, including acceptability of engineering reports. EFC accepts new project listings on a continuous basis, but applicants must have already submitted their project through PLUS to be included in the 2026 IUP for funding in this IUP Period. To be included in the Draft 2027 IUP, applicants must submit their project information through PLUS by May 29, 2026. EFC will add WIIA/IMG projects not already listed on the IUP to the subsequent IUP if a WIIA/IMG applicant indicates interest in CWSRF financing and completes a listing form through PLUS.

Municipal officials with listed projects must update their project information annually through PLUS, unless they submitted an acceptable financing application to EFC that will not expire the following IUP period, executed a short-term project finance agreement with EFC, or have been awarded a grant by EFC.

Updating the information in PLUS ensures that the Annual List remains current and contains projects and scope that applicants plan to finance in the current IUP Period.

If an applicant did not update their project information through PLUS by the end of the project listing and update period, which closed May 30, 2025, that project is not on the Annual List in this IUP and will not be eligible for CWSRF financial assistance during the 2026 IUP Period.

If an applicant does not update their project information using PLUS for two consecutive years, EFC designates the project inactive, and it no longer appears in the IUP. If this occurs, the applicant must submit a new project listing form through PLUS to re-list the project on the IUP in a subsequent year.

## 6. Project Contracts

All contracts must include the applicable Mandatory SRF Terms & Conditions (T&Cs). Projects tagged as equivalency projects (see [Section 9C](#)) must use the Equivalency Projects Mandatory SRF T&Cs. If the applicable T&Cs are not included, the project will not be eligible for CWSRF financial assistance. Contract documents containing front-end materials must be submitted for EFC's approval prior to EFC disbursing on such contracts.

Municipalities requesting financing for Architectural/Engineering (A/E) services must procure A/E services in accordance with certain qualification-based requirements. This applies to **all projects** financed by EFC. Please see the guidance document on EFC's [website](#) for more information about the types of services that are considered A/E services and how these A/E services must be procured.

**Note:** Plans and specifications acceptable for bidding must be submitted to EFC at least 60 days prior to advertising for bidding. Construction contracts will not be funded if the recipient fails to meet this requirement.

## 7. Design Documentation

Planning and Design documents define the project listed on the IUP and the scope of work to be financed. These documents include, but may not be limited to:

- Engineering Reports;
- Map, Plan and Report<sup>2</sup> documents;
- Basis of Design Reports; and
- Plans, Specifications, and Addenda.

### A. Engineering Reports

Engineering reports must conform to the current Engineering Report Outline (the Outline) available on [EFC's website](#). EFC will reject reports not in conformance with the Outline and will not include projects with rejected reports on the Annual List.

Projects with engineering reports dated September 2022 or earlier must submit a new or revised report that complies with the current Outline by the due date for new project listings (May 29, 2026) to be considered for the Annual List for the 2027 IUP. Projects defined by reports dated

---

<sup>2</sup> As required by the Office of the State Comptroller (OSC) for special improvement districts.

before September 2022 will be moved to the Multi-Year List for the 2027 IUP. Engineering reports deemed eligible by EFC will not be subject to amending to update the most recent Outline.

EFC will not begin technical review of an engineering report until an acceptable financing application is received. EFC will only execute a finance or grant agreement once the engineering report has been deemed eligible by EFC.

## B. Plans, Specifications, Basis of Design Reports, and Addenda

All plan sheets, the cover of each specification book, and all technical addenda must be prepared, signed, and stamped by a qualified professional engineer licensed to practice in New York State. At the time of submission, plans and specifications must be final contract documents ready to be issued for solicitation. A current cost estimate based on the submitted contract documents must accompany the plans and specifications. Specifications must include the applicable SRF T&Cs (Note: Projects that meet the conditions outlined in [Section 9C](#) must include the Equivalency T&Cs) or they will not be eligible for CWSRF financial assistance.

**Note:** Plans and specifications acceptable for bidding must be submitted to EFC at least 60 days prior to advertising for bidding. Construction contracts will not be funded if the recipient fails to meet this requirement.

## 8. Financing Terms and Financial Assistance

### A. Financial Assistance

EFC works with applicants to identify the appropriate financial assistance option(s) for a project, and EFC funding packages may include one or more of the funding options as outlined in this section. Subject to a credit review, the project score, legal considerations, co-funding, and construction schedule, EFC will determine the appropriate term and type of assistance that may be offered. EFC's financial assessment will include, but not be limited to, review of the project budget, municipal bond resolutions, current annual financial report to the Office of the State Comptroller, debt affordability measures, available ratings information, SRF repayment history (if any), and other financial information.

### B. Hardship Financing

Municipalities may qualify for up to \$25 million of interest-free hardship financing based on median household income (MHI) and poverty level, among other factors. Some municipalities may also qualify for additional subsidy in the form of grant or principal forgiveness. All projects meeting hardship criteria are listed in Category D. Municipalities will need to requalify for hardship on an annual basis if they do not submit an acceptable financing application by the application deadline identified in [Section 1](#).

For FFY 2026, EFC is using MHI, population, and poverty data from the 2023 American Community Survey 5-year data, published by the U.S. Census Bureau. Eligibility for hardship financing is discussed in the Hardship Policy, available on [EFC's website](#). Hardship and disadvantaged are used interchangeably for purposes of the CWSRF and the Hardship Policy.

### C. Additional Subsidy

Additional subsidy is provided to hardship communities that meet certain demographic and affordability criteria. The specific criteria for determining hardship and eligibility for additional subsidy are set forth in the Hardship Policy.

CWSRF IIJA General Supplemental additional subsidy is made available in Subcategory D1, in Blended Affordability Score order, as defined in the Hardship Policy, for municipalities that have:

- Been notified that their project is eligible for hardship financing;
- Submitted an acceptable financing application;
- Not executed a CWSRF short-term project finance agreement before November 15, 2021;
- Not executed a long-term project finance agreement; and
- Not substantially completed construction before the beginning of the current IUP Period.

CWSRF Base additional subsidy will generally first be allocated to GIGP projects meeting Green Project Reserve requirements, then may be allocated to subcategory D1 to be made available in Blended Affordability Score order based on eligibility requirements outlined below and in the Hardship Policy.

Recipients of CWSRF Base additional subsidy may receive 25% of eligible project costs, net of non-EFC grants, up to a maximum of \$2 million. Recipients of IIJA General Supplemental additional subsidy may receive up to a combined 50% of eligible project costs, net of non-EFC grants, up to a maximum of \$25 million. Municipalities will be limited to \$25 million in additional subsidy over five years. A project is eligible for additional subsidy up to the amount indicated in the notification letter. After the project closes with IIJA additional subsidy, it will not be eligible for further IIJA additional subsidy.

CWSRF IIJA EC additional subsidy is provided to applicants whose projects primarily address emerging contaminants where testing confirms onsite presence, as defined in [Section 2B](#). IIJA EC additional subsidy is made available in Subcategory EC. Recipients of IIJA EC funds are eligible for additional subsidy on 100% of eligible projects costs, up to a maximum of \$25 million over five years. Eligible recipients must submit a timely financing application to secure funds. Funds will be made available on a first-come-first served basis, in the order acceptable applications are received.

EFC will set a date by which additional subsidy must be obligated in a fully executed project finance or grant agreement with EFC. Eligibility for additional subsidy will expire if an agreement is not executed by this date.

Additional subsidy may be provided to a recipient that does not meet the affordability criteria set forth in the Hardship Policy under limited circumstances. The recipient must: (i) demonstrate that the additional subsidy benefits individual ratepayers in the residential user rate class; (ii) demonstrate that such ratepayers will experience a significant hardship from the increase in rates based on the project being financed; and (iii) ensure that the additional subsidy is directed through a user charge rate system or other appropriate method to such ratepayers (see CWA §603(i)(1)(A)).

The availability of funds for applicants/projects on the IUP is determined based on the estimated Capitalization Grant awards. These federal awards are based on Congressional appropriations and are subject to the final approval of the federal CWSRF Capitalization Grant allotments. The amount available to individual applicants/projects is subject to change in the event that there are insufficient funds to provide to all projects for which applicants are ready to proceed in the IUP year.

#### D. Application of Multiple EFC Grants

Municipalities may be eligible to receive IIJA, WIIA/IMG, CWSRF Base, GIGP, and Sewer Overflow and Stormwater Reuse Municipal (OSG) grants on the same project.

#### E. Financing Options

Short-term financing provides recipients with funding to plan, design, and construct CWSRF eligible projects. Recipients of short-term financing will typically issue a grid note to EFC as evidence of their obligation to repay their short-term financing. A grid note allows the recipient to borrow only what they need during the term of the short-term financing, up to a stated maximum principal amount. Debt is incurred by the recipient as disbursements are made under the grid note.

A short-term financing (note) will become due and payable upon 60 days' notice from EFC if the project is abandoned. Short-term financing cannot be used for the refunding of long-term debt (bonds).

The Recipient's note may be refinanced by EFC with a long-term financing or may be financed by the recipient with non-SRF funding. When final project costs are known and programmatic requirements are satisfied, a short-term financing may be refinanced by EFC as part of the next available leveraged financing or as a long-term direct financing.

## Short-Term Financing

### Short-Term Subsidized Financing

<b>Rate</b>	Interest-free for half of eligible project costs or half of the IUP Amount, whichever is less, and market-rate for the balance.
<b>Amount</b>	The lesser of eligible project costs or the IUP Amount.
<b>Qualifications</b>	Creditworthy, project priority score must be 10 points or above.
<b>Fees</b>	None.
<b>Notes</b>	May not be used to pre-finance awarded grants.

### Short-Term Market-Rate Financing (SMRF)

<b>Rate</b>	Municipal Market Data (MMD) AAA scale 1-year plus issuance costs.
<b>Amount</b>	The lesser of eligible project costs or the IUP Amount.
<b>Qualifications</b>	Creditworthy, project priority score must be 10 points or above.
<b>Fees</b>	None.
<b>Notes</b>	Projects with a priority score below the Subsidy Line or costs otherwise not eligible for subsidized financing. May be used to pre-finance awarded grants.

## Short- and Long-Term Financing

### Hardship Financing

<b>Rate</b>	Interest-free.
<b>Amount</b>	Up to \$25 million of eligible project costs.
<b>Qualifications</b>	Creditworthy, applicants must qualify pursuant to the criteria set in the Hardship Policy. Project priority score must be above the subsidy line.
<b>Fees</b>	None.
<b>Notes</b>	Restrictions apply. See Hardship Policy

## Long-Term Financing

### Long-Term Subsidized Financing (Leveraged)

<b>Rate</b>	50% of market rate based on EFC's bond rating.
<b>Amount</b>	The lesser of eligible project costs or the IUP Amount.
<b>Qualifications</b>	Creditworthy, project priority score must be above the subsidy line.
<b>Fees</b>	One-time fee of 1% of the project costs supported by bonds for financings under \$100 million. For financings over \$100 million a one-time fee of 0.8% of project cost supported by bonds. State Bond Issuance Charge applies. Annual Administrative Fee of 0.25% calculated on outstanding balance.
<b>Notes</b>	EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.

### Long-Term Market-Rate Financing (Leveraged)

<b>Rate</b>	Market rate based on EFC's bond rating.
<b>Amount</b>	The lesser of eligible project costs or the IUP Amount.
<b>Qualifications</b>	Creditworthy, projects with a priority score below the subsidy line, projects not eligible for subsidy.
<b>Fees</b>	One-time fee of 1% for financings under \$100 million. For financings over \$100 million a one-time fee of 0.8%. State Bond Issuance Charge applies.
<b>Notes</b>	EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.

### Long-Term Financing (Direct)

<b>Rate</b>	Market rate based on EFC's bond rating.
<b>Amount</b>	The lesser of eligible project costs or the IUP Amount.
<b>Qualifications</b>	Creditworthy.
<b>Fees</b>	Annual Administrative Fee of 0.25% calculated on outstanding balance.
<b>Notes</b>	None.

### Other Financial Assistance Programs Provided with CWSRF Funds

#### GIGP

<b>Rate</b>	Not applicable – Grant.
<b>Amount</b>	50% to 90% of eligible planning, design, and construction costs.
<b>Qualifications</b>	Projects must meet EPA Green Project Reserve criteria.
<b>Fees</b>	None.
<b>Notes</b>	Applicants are required to follow all federal A/E procurement requirements.

#### EPG

<b>Rate</b>	Not applicable – Grant.
<b>Amount</b>	Up to \$100,000 for planning costs.
<b>Qualifications</b>	Municipalities must meet the criteria identified in the eligibility requirements outlined in the EPG program overview.
<b>Fees</b>	None.
<b>Notes</b>	\$3 million available in this IUP Period. Applicants are required to follow all federal A/E procurement requirements.

## F. Applications for Financial Assistance

An acceptable financing application must be submitted before May 29, 2026 to be eligible for funding in this IUP Period. Financing applications will be accepted on a continuous basis until May 29, 2026. Applications received after May 29, 2026 will be deferred to the next IUP Period and the project may need to requalify for subsidized financing. Financing applications from municipalities that are more than one-year delinquent with their Annual Financial Report (AFR) filings with Office of the State Comptroller will be deemed unacceptable.

The following items must be completed and submitted to EFC for a financing application to be deemed acceptable:

1. Bond resolution establishing the legal authority to issue the appropriate amount of debt for the project.
2. Environmental review in accordance with the State Environmental Quality Review (SEQR) process in the manner prescribed by EFC, including the applicable State Historic Preservation Office (SHPO) review. See [Section 9D](#) for more information.
3. Applicable to towns and counties only: Establishment of new or expanded sewer district, or district maximum expenditure increase, and approval from the Office of State Comptroller, if required.

During development of a project finance agreement, the applicant must submit a current project budget incorporating reasonable contingency and forecasted inflation factors that has been updated within the prior six months. All financing applications submitted to EFC by the May 29, 2026 application due date and deemed acceptable will be considered for financial assistance through September 30, 2027. Applications are considered inactive and will not be processed if they were submitted prior to October 1, 2023 and the applicant is not actively proceeding toward execution of a project finance agreement with EFC.

While financing applications must be submitted before the due date, they should be submitted as early as practicable and several months in advance of when funds are needed. EFC recommends that applicants:

- Access the financing application on [EFC's website](#) and consult the guidance materials; and
- Contact EFC as early as possible in the application preparation process to ensure the proper documents are collected, programmatic conditions are adhered to, and forms are completed.

CWSRF projects are subject to the State Smart Growth Public Infrastructure Policy Act (the Smart Growth Act). The Smart Growth Assessment is used to establish that the project, to the extent practicable, meets the criteria of the Smart Growth Act. The Smart Growth Assessment is included in the financing application and is required as part of an acceptable financing application.

Submit the financing application and required documents using the EFC Portal on [EFC's website](#). If you have questions, please call 518-402-6924 for assistance.

## G. Program Requirements

A recipient of CWSRF Base and IIJA financial assistance and its contractors must comply with certain federal and State regulatory requirements as outlined in [Section 9C](#), including, but not limited to:

- American Iron and Steel (AIS) or Build America, Buy America (BABA);
- Davis-Bacon and Related Acts federal wage rates;
- Federal Architectural/Engineering (A/E) procurement process;
- Equal Employment Opportunity (EEO); and
- Minority- and Women-Owned Business Enterprise (MWBE) or Disadvantaged Business Enterprise (DBE) participation.

EFC also encourages all recipients to utilize Service-Disabled Veteran-Owned Businesses (SDVOBs).

Mandatory T&Cs are available on [EFC's website](#), and provide EFC's recipients and their contractors with required contract and subcontract language. Also available on [EFC's website](#) are forms, guidance materials, and training videos for contractors and subcontractors.

The recipient must incorporate the applicable T&Cs into all contracts for which they are pursuing CWSRF financial assistance, including contracts entered into prior to application for CWSRF financing. Therefore, if a municipality intends to apply for CWSRF assistance, it must ensure that all contracts it enters into for a project include the applicable T&Cs. All projects financed under IIJA and all projects financed with CWSRF Base funds that are identified as equivalency projects must incorporate Equivalency T&Cs. Failure to adequately incorporate and implement the applicable T&Cs in any contract could result in the loss of CWSRF financial assistance.

EFC may hold disbursements on a project when the recipient does not satisfactorily respond to EFC's request for documentation of compliance with programmatic requirements.

## 9. EFC Compliance with EPA Program Requirements (Assurances and Specific Proposals)

40 CFR § 35.3150 requires the State to provide assurances of the CWSRF program's compliance with certain federal requirements. The State's assurances are embodied in the Operating Agreement, dated as of November 21, 2017, between the DEC and the EPA (the Operating Agreement), which provides for the organization and administration of the State's CWSRF. The Federal Assistance ID Number is CS-360001 and CFDA number is 66.458.

### A. Binding Commitments

The State will make binding commitments through execution of project finance agreements or grant agreements with CWSRF recipients in a total amount equal to 120% (100% for IIJA EC) of each Capitalization Grant payment within one year after receipt of payment. If the State commits more than the required percentage, the EPA will recognize the cumulative value of the binding commitments, and the excess balance may be banked towards the binding commitment requirements in subsequent years.

## B. Timely Use of Funds

The State will expend CWSRF Base, IIJA General Supplemental, and IIJA EC funds in an expeditious and timely manner.

## C. Compliance with Federal Requirements (Equivalency Projects)

The amount equal to the funds “directly made available” by a Capitalization Grant is considered federal funds, or federal financial assistance. Accordingly, treatment works projects with project costs totaling an amount equal to a Capitalization Grant must meet various federal grant regulatory requirements.

EFC identifies equivalency projects on the Annual List with an “E” notation. If tagged with an “E” notation in the IUP, the recipient is required to demonstrate compliance with various federal laws, regulations, and executive orders relating to: federal cross-cutting authorities; exclusion on using certain Chinese telecommunications equipment; National Environmental Protection Act (NEPA) environmental review; DBE; BABA; and the Single Audit Act (SAA), as applicable. EFC has prepared guidance and certifications to assist project sponsors in meeting the “equivalency” requirements, which can be found on [EFC’s website](#).

## D. Environmental Review

Potential environmental impacts must be considered for projects receiving CWSRF Base, IIJA General Supplemental, and IIJA EC financial assistance, in accordance with EFC’s state environmental review process (SERP). This applies for all treatment works construction projects (Clean Water Act § 212), including NPS pollution control projects (Clean Water Act § 319) and estuary protection projects (Clean Water Act § 320) that are also treatment works projects.

## E. State Match Funds and Anticipated Cash Draw Ratio

For FFY 2026, the State will use State General Fund appropriations to provide the required 20% match to the CWSRF Base and CWSRF IIJA General Supplemental funds. No state match is required for IIJA EC funds.

For CWSRF Base and IIJA General Supplemental funds, the State expects to use a cash draw ratio of 83.33% federal funds and 16.67% state funds.

## F. Transfer of Funds between SRF Programs

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorized states to meet their most pressing funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). Transfers totaling \$82,443,933 were made from the CWSRF to the DWSRF from FFY 1997 through 2001. Prior to any transfer of funds, the IUP would be amended to note the proposed transfer and the public would be provided the opportunity to comment. If insufficient projects are available in this IUP Period to utilize the IIJA EC funding available, EFC may transfer funds to the DWSRF in accordance with this section.

## G. Green Project Reserve

Annual federal appropriations require that EFC use a portion of each Capitalization Grant to finance projects or aspects of projects that meet the EPA's Green Project Reserve (GPR) requirement. GPR projects must be CWSRF-eligible and EFC encourages projects to incorporate all four of the following categories into their projects:

1. Address stormwater and wet weather issues through the use of green infrastructure;
2. Promote energy efficiency;
3. Promote water efficiency; and
4. Use innovative approaches to managing water resources.

GIGP focuses additional subsidy in the form of grant towards projects that meet the most recent (2012) EPA GPR Guidance. A GIGP project is scored and selected based on the level to which the project:

- Protects or makes measurable improvements to water quality, including generating water quality metrics;
- Establishes or restores natural features, ecology, and hydrology;
- Implements measures that address climate change, including cooling the surrounding environment, mitigating urban heat islands, reducing air pollution, and reducing energy use;
- Is likely to succeed based on project development at time of application;
- Leverages additional resources through removing barriers to collaboration, developing new partnerships, utilizing staff, securing other funding and investments, and/or provides workforce development;
- Plans for the long-term operation, maintenance, and water quality of the project;
- Provides opportunities for the applicant to facilitate the transfer of new technologies, knowledge, and practices to other water quality issues and other regions of the State; and
- Spurs innovation in the area of green stormwater infrastructure, energy efficiency, or water efficiency through the development and/or adoption of new technologies.

The remainder of the GPR requirement will be met with CWSRF projects funded from Categories A, B, C, and D that implement GPR practices. The list of projects used to meet the GPR requirement and their approved GPR amounts will be identified in CWSRF Annual Reports.

GPR requirements for FFY 2026, if any, are unknown as of the date of this IUP.

# 10. Allocation, Sources and Uses of Funds

## A. Sources and Uses

Table A identifies the estimated sources of funds for FFY 2026 and their uses. EFC expects to allocate approximately \$2.5 billion to new financings in FFY 2026 (Table B). This amount includes unused funds allocated to projects in the 2025 IUP for which a project finance agreement was not executed in FFY 2025.

**Table A – Sources and Uses of Subsidized Financing<sup>3</sup>**

**Estimated Sources of Funds for Federal Fiscal Year 2026 as of July 1, 2025**

Description	Amount
Funds for projects with Complete Applications	\$ 858,222,217
Unused 2025 funds	\$ 165,855,749
Equity returned from conversion to long-term leveraged financing	\$ 428,521,736
Subtotal – Remaining Resources on October 1, 2025:	\$ 1,452,599,702
Base Capitalization Grant	\$ 16,599,000
State Match for Capitalization Grant	\$ 3,319,800
IIJA General Supplemental Capitalization Grant	\$ 540,753,000
State Match for IIJA General Supplemental Capitalization Grant	\$ 108,150,600
IIJA Emerging Contaminants Capitalization Grant	\$ 105,458,000
Repayments 10/1/24 – 9/30/25	\$ 559,514,553
Investment Returns	\$ 199,055,249
<b>Total Estimated Sources of Funds for Federal Fiscal Year 2026 as of July 1, 2025:</b>	<b>\$ 2,985,449,904</b>

**Proposed Uses of Funds During Federal Fiscal Year 2026**

Description	Amount
Projects in Category A, B & C (Funds for Short-Term or Long-Term Leveraged Financings)	\$ 895,800,457
Projects in Cat. A, B, C, and D with Acceptable Applications Submitted by May 30, 2025	\$ 858,222,217
Projects in Category D	\$ 1,012,454,730
Projects in Category E	\$ 0
Projects in Category EC	\$ 59,843,000
Additional Subsidy for Category G – GIGP	\$ 15,000,000
Subtotal – Amount for Projects	\$ 2,841,320,404
Bond Debt Service	\$ 458,227,101
2026 Program Administration	\$ 0
Subtotal – Bond Debt Service and Program Administration:	\$ 458,227,101
<b>Total Proposed Uses of Funds During Federal Fiscal Year 2026:</b>	<b>\$ 3,299,547,505</b>

<sup>3</sup> Amounts will differ from National Information Management System (NIMS) because the reporting periods are different. All amounts are estimates and may be adjusted based on the final approval of federal CWSRF allotments.

## B. Allocation of Funds

To fund short-term direct and long-term direct financings this IUP Period, EFC will use:

- the CWSRF Base, IIJA General Supplemental and IIJA EC Capitalization Grants and the associated State match, as applicable;
- repayments on financings;
- recycled funds; and
- returns on investments.

EFC's leveraged long-term financings (subsidized and market-rate) will be funded with bond proceeds and/or other available assets.

**Table B – Allocation of Project Dollars**

<b>Category</b>	<b>Category Subtotal (Annual List)</b>	<b>Category Subtotal/ Total List</b>	<b>Funds</b>	<b>Potential Loans and Grants</b>
Category A	\$ 613,367,967	16.97%	\$ 152,017,338	\$ 304,034,676
Category B	\$2,034,351,413	56.30%	\$ 504,335,657	\$1,008,671,314
Category C	\$1,349,407,270	26.73%	\$ 239,447,462	\$ 478,894,924
Category D	\$1,081,367,502	-	\$ 691,853,904	\$ 691,853,904
Projects in Cat. A, B, and D with Acceptable Applications in 2025	N/A	N/A	N/A	\$ 858,222,217
Category E	N/A	N/A	\$ 0	\$ 0
Category G - Green Innovation Grant Program	N/A	N/A	\$ 15,000,000	\$ 15,000,000
		<b>Total</b>	\$1,602,654,361	\$3,356,677,035

The availability of funds for applicants/projects on the IUP is determined based on the estimated Capitalization Grant awards. These federal awards are based on Congressional appropriations and are subject to the final approval of the federal CWSRF Capitalization Grant allotments. The amount available to individual applicants/projects is subject to change in the event that there are insufficient funds to provide to all projects for which applicants are ready to proceed in the IUP year.

## C. Use of Administrative Funds

Three main sources of funds support administrative expenses: a portion of each Capitalization Grant, the intended allotment of which is shown in Table A; an annual administrative fee that is charged to long-term non-hardship borrowers; and fees we collect related to refundings. These fees are held in an account outside the CWSRF and are used to cover administrative expenses that may not be recovered from the Capitalization Grant.

Administrative fees consist of two components – program income and non-program income. The uses of program income earned during the grant period are subject to restrictions by EPA, while program income earned after the grant period and non-program income may be used to fund a variety of water quality activities.

As of August 2025, EFC estimates it will receive a total of approximately \$17.1 million from administrative fees in FFY 2026, consisting of about \$14.3 million in program income and \$2.8 million in non-program income.

In addition to covering administrative expenses, EFC funds certain water quality activities as permitted by EPA. EFC anticipates the following uses of administrative fees during the IUP Period: \$3 million for EPG; up to \$500,000 for Environmental Justice Value Engineering; up to \$200,000 for the Excelsior Conservation Corps and up to \$4.5 million for technical, financial, and managerial capacity assistance for financially distressed communities.

#### D. Use of Technical Assistance Funds

The IIJA allows the State to use two percent of each Capitalization Grant awarded annually for nonprofit organizations or State, regional, interstate, or municipal entities to provide technical assistance to small, rural, and tribal publicly owned treatment works in the State.

EFC intends to reserve two percent of the IIJA General Supplemental and IIJA EC Capitalization Grants to conduct project development activities for communities with a population of less than 10,000 including, but not limited to assisting communities with:

- Planning and developing an engineering report with funds made available for the EPG program;
- Listing a project(s) on the IUP;
- Applying for additional subsidization and financing;
- Asset management planning; and
- Documenting affordability where readily available statistics are not adequate.

EFC also intends to reserve two percent of its 2026 CWSRF Base Capitalization Grant to provide technical assistance to small, rural, and tribal publicly owned treatment works.

## 11. Program Goals

The State has the following short-term goals for the CWSRF in FFY 2026:

1. Advance both the environmental and economic goals of the State and the CWSRF to fund the highest priority water quality improvements as soon as needs arise by committing FFY 2026 funds to projects that are ready to proceed with construction, or otherwise positioned to have funds disbursed quickly and steadily.
2. Implement EFC's financing programs in a manner that benefits small, rural, and disadvantaged communities.
3. Implement program changes that incentivize financed projects to proceed expeditiously with the construction of infrastructure so that their benefits may be realized as soon as practicable.

4. Evaluate projects for and provide priority points to those that address resiliency to threats such as natural disasters, extreme wet weather events, bioterrorism, and cyber-attacks.
5. Work with DEC to develop and financially support projects that address emerging contaminants as regulations are developed.

The State has the following long-term goals for the CWSRF program:

1. Encourage use of asset management planning for municipal facilities to prioritize infrastructure investment and fiscal planning to sustain the valuable wastewater infrastructure.
2. Implement EFC's financing programs in a manner that benefits small, rural, and disadvantaged communities
3. Reduce energy use at wastewater treatment plants by financing energy efficiency improvements, installation of renewable energy infrastructure, and inflow and infiltration elimination that reduce the volume of wastewater treated.
4. Enhance the program to continue providing reduced interest rate financings and additional subsidy that encourage the repair, replacement, and upgrade of existing infrastructure and the construction of new point source, nonpoint source, and estuary projects to improve, maintain, or protect water quality.
5. Provide financial assistance for projects that will protect groundwater, consistent with DEC's goal to prevent pollution and protect the State's groundwater as a source of potable water supply.
6. Help recipients achieve and maintain compliance with Federal and State water quality standards and enforceable requirements of the Clean Water Act for the protection and enhancement of New York's water resources.
7. Promote the innovative use of green infrastructure to effectively manage stormwater and encourage the incorporation of green infrastructure practices into traditional gray infrastructure projects.
8. Continue to identify and increase meaningful opportunities for participation by minority- and women-owned business and disadvantaged business enterprises in projects that are supported with CWSRF financial assistance.

## 12. Public Comment

EFC accepted comments from the public regarding this IUP through September 12, 2025. A notice regarding the availability of the IUP for public review and a request for comments was published in the Environmental Notice Bulletin (ENB) on August 13, 2025. The following comments were submitted:

**Comment 1:** The ability to benefit from the Disadvantaged Communities designation is often critical to a community's ability to receive the funding and services that are needed. In Southeast Queens, Communities that are designated as DACs under the federal guidelines

were not considered as DACs under the state guidelines. This is particularly hurtful to certain of our communities that suffer from groundwater flooding but do not receive the DAC designation that would allow relief funding to be directed to our area. We would ask that the state DAC designation be aligned with the federal designation, which would allow our communities to receive the resources that we require to deal with groundwater flooding conditions that are devastating our residences, businesses and institutions in the southeast Queens community of New York City.

**Answer:** The designation of a Disadvantaged Community (DAC) was determined using criteria developed by the Climate Justice Working Group (CJWG) pursuant to the Climate Leadership and Community Protection Act. As DAC designations were established through a separate statewide process, the IUP does not include a mechanism to modify the DAC criteria or align them with federal designations. Any future changes to the DAC criteria would need to be considered through a subsequent CJWG process or other applicable regulatory or statutory process.

**Comment 2:** I was browsing the draft 2026 IUP and noted that on Page 5, Section B, Category 5 indicated, "...Non-municipally owned projects. EFC is not entering into new agreements with non-municipal entities in 2026". Would this mean that EFC will not be allowing Public Benefit Corporations or other similar public entities to apply for funding opportunities?

**Answer:** Pursuant to Public Authorities Law § 1281(5) public benefit corporations and public authorities established pursuant to the laws of New York are considered municipalities for purposes of administering the CWSRF.

**Comment 3:** In the interest of transparency, the final CWSRF IUP should list all of the projects that qualify for Additional Subsidy on the D1 list, along with their corresponding blended affordability score – not just the ones with a seemingly arbitrary score of "2026." As has been done in the past, the final IUP should include a clear "funding line" for the D1 list in order to maintain consistency with how all of the other lists are presented in the IUP and allow applicants the ability to see how their project ranked in relation to other projects.

**Answer:** Subcategory D1 lists projects that are eligible for IIJA General Supplemental Additional Subsidy. At this time, EFC has allocated all the available IIJA General Supplemental funding. However, if projects currently in D1 do not move forward, we will continue to reallocate funds to the next available eligible projects. That will be shown in upcoming IUP amendments and the municipalities will be notified directly. For Base CWSRF Additional Subsidy eligibility, please refer to the CWSRF Hardship Policy.

EFC responded to comments regarding specific projects directly.

## 13. Amendments and Modification

EFC may amend the IUP to reflect project or program modifications during the IUP Period. EFC will make such amendments only after publication of a notice in the ENB and an opportunity for public comment. EFC will post any draft amendments on [EFC's website](#) during the public review and comment period and will publish final amendments on [EFC's website](#). EFC intends to amend the IUP during the IUP Period to add projects eligible for FFY 2026 IIJA EC funding.

In situations where proposed changes to the Annual List could jeopardize access to subsidized financing to a small number of projects, EFC will communicate with each of the affected communities to solicit comments or concerns in lieu of processing an amendment.

## 14. CWSRF Project Numbering System (ex: C4-5863-01-00):

- “C” designates a CWSRF project.
- “4” designates the DEC Region.
- “5863” is the base number.
- “01” is the 2-digit project number.
- “00” is the project phase.

## 15. Table of Abbreviations Used in Project Descriptions:

<b>Abbreviation</b>	<b>Definition</b>
COMP	Composting or co-composting STP sludge, where municipality has not applied for DEC Title 7 assistance
COMP (TITLE 7)	Composting or co-composting STP sludge, where municipality has applied for DEC Title 7 assistance
COLL	Collector/sanitary sewers
CSO	Combined Sewer Overflow (control, treatment, or conveyance)
EST	Estuary
EXP	Expansion or increase in capacity
FM	Force main
I/I CORR	Infiltration and inflow correction
LF-CAP (TITLE 3)	Closure or capping of an inactive hazardous waste landfill, where municipality has applied for DEC Title 3 assistance
LF-CAP (TITLE 5)	Closure or capping of a solid waste landfill, where municipality has applied for DEC Title 5 assistance

<b>Abbreviation</b>	<b>Definition</b>
LF-CAP (MSW)	Closure or capping of a solid waste landfill, where municipality has not applied for DEC Title 5 assistance
LF-GAS	Landfill gas collection and control systems up to the point of sale of the gas as a fuel or conversion to energy
LF-LCH	Landfill leachate collection, storage, and treatment
NPS	Nonpoint source
ORF	Overflow retention facility
OS	Outfall sewer
PS	Pump station
REBUILD	Major repairs and replacement of worn-out facilities
REHAB	Rehabilitation
REMED	Remediation of contamination from leaking petroleum storage tanks or other municipal facilities
REPL	Replacement
SALT-STOR	Deicing materials storage facility
SEP	Separation
SEW	Sewer
SSO	Sanitary sewer overflow (control, treatment, or conveyance)
STMSEW	Storm sewer
STP	Sewage treatment plant/wastewater treatment plant
UP	Upgrading the treatment process level
WTP	Water treatment plant

## 16. Project Priority Lists

### Appendix A – Multi-Year Project Priority List

**2026 CWSRF INTENDED USE PLAN**

**Multi-Year List**

(projects sorted in alphabetical order)

Project No.	On Ann	Category	Applicant Name	Service Area / Project Description	Total Cost	SPDES No.	Total Score
C7-6357-01-00	X	D/D1	Afton, Village of	Village COLL, STP	\$18,100,000	New SPDES	53
C9-6635-03-00	X	D	Akron, Village of	East Ave Sewer I/I CORR, SEW REPL	\$5,400,000	NY0031003	33
