

TO FEED OR NOT TO FEED

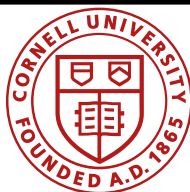

Feeding leads waterfowl to congregate in lakes and produce an unnatural number of droppings that create excess nutrients in water and cause water quality problems.

WHAT CAUSES PATHOGENS?

Remember: Don't feed the waterfowl, pick up pet waste, and dispose of trash properly to keep harmful pathogens out of our water. Let's protect our environment together!

YOU CAN MITIGATE HARMFUL PATHOGENS IN OUR WATERWAYS!

- **Dog Waste**– Pick up and properly dispose!
- **Waterfowl** – Do not feed them!
- **Flushing wipes** – Do not flush anything but toilet paper!
